**DETAILED ACTION****EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 28, line 9, " input terminal of said composite amplifier" has been changed to -- input terminal of said high-speed amplifier --.

***Allowable Subject Matter***

Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance: prior art, U.S. Patents # 4,623,786 and # 6,201,442 B1, does not teach nor render obvious an amplifier circuit that has, in combination with other limitations, a combination of a bypass device coupled in parallel with the feedback element and a stabilization circuit, the bypass device configured to provide a path for additional current to flow through during overload condition; and the stabilization circuit configured for stabilizing the composite amplifier during the overload condition; nor does it have a method for reducing overload recovery time in an amplifier circuit that has the steps of sensing when an overload condition exists at an output terminal of said amplifier circuit and stabilizing said amplifier circuit during said overload condition.
